Mindset: Our approach is restorative in nature and trauma informed. We believe that kids do well when they can. We work to identify what is getting in the way of success and intervene appropriately.

Services: Promise Zone Specialists support the entire school population and do not carry a specific case load. However, we can work more intensely with students as a support coach with a more pro-active approach that will include planned interventions, goals and progress monitoring. Promise Zone Specialists can support up to 10 students. Support Coach lists will vary by student needs.
